1. Introduction

The purpose of this document is to disclose both qualitative and quantitative information regarding the Bank's capital adequacy position, risk profile and risk management practices in terms of the Basel III requirements under Regulation 43 of the regulations relating to banks.

In terms of Regulation 43(1) (e) (iii) of regulations relating to banks, minimum disclosure on capital adequacy of the bank is required on a quarterly basis. This announcement meets the on-going report requirement for quarterly disclosure in terms of Pillar 3 of the Basel III capital accord.

The Pillar 3 report is produced and published quarterly. This report is verified and approved internally in line with the Bank's disclosure policy.

The Pillar 3 report has not been audited by the Bank's external auditors.

Business Profile

Access Bank (South Africa) Limited (The Bank) began in 1947 and is focused on developing and delivering banking services to corporates, medium-sized businesses and individuals, driven by a unique combination of retail, corporate, business and alliance banking.

Business and Commercial Banking is focused on the cornerstones of business banking (transactional banking, lending and deposit services) and targets the small and medium sized business customer. To facilitate international business transactions Business and Commercial banking is fully integrated with the Treasury and Global Transactional Services ("GTS") business (see below). Access Bank South Africa also offers risk and investment solutions from leading providers in the industry which includes short and long term insurance as well as investment management services. These solutions are delivered through three business suites situated in key business centres across South Africa.

The Bank's GTS business is focused on providing professional and personalised foreign exchange (import and export) services to the small and medium sized business customer. GTS's range of products include spot and forward contracts, foreign currency accounts, letters of credit, collection of foreign currency, cross border payments and exchange control applications.

Corporate Banking provides innovative financial solutions to their customers which include working capital facilities, long-term debt solutions, trade finance solutions and currency hedging solutions.

The Bank provides financing to importers and exporters of goods through letters of credit and other bespoke trade solutions.

Retail Banking is a new segment of the bank launched during the latter part of 2021 to provide transactional products to individuals and micro enterprises. The initial focus is on transactional banking and deposits, but loan financing will be introduced towards the end of 2022. Six retail branches were opened (three in Gauteng, one in Cape Town, one in Polokwane and another one in Durban) and one mobile banking unit was launched.

Restrictions on transfer of funds or regulatory capital

There are currently no restrictions or other major impediments on the transfer of funds or capital within the Bank.

2. Capital Management

The Bank is subject to minimum capital requirements as defined in the Banks Act and Regulations pertaining to Banks.

The Risk Management Committee considers the various risks faced by the Bank and analyses the need to hold capital against these risks whilst taking account of the regulatory requirements. In addition, the level of capital required to support the Bank's targeted business growth is taken into consideration.

The objective of the Bank's capital management approach is to ensure the maintenance of sound capital ratios, taking all the above requirements into account, whilst producing appropriate returns to shareholders. The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- To comply with the capital requirements set by the regulators of the banking industry in which the Bank operates;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

The capital of the Bank consists of Tier 1 capital and Tier 2 in the form of IFRS general provision. Capital adequacy and the use of regulatory capital are monitored by ALCCO, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the South African Reserve Bank (SARB), for supervisory purposes. The required information is filed with the SARB on a monthly basis.

The Bank maintains a ratio of total regulatory capital to its risk-weighted assets above a minimum level agreed with the SARB which takes into account the risk profile of the Bank.

The Bank met the minimum required capital adequacy ratio requirement as at the 30 September 2022 with a total capital adequacy of 18.83% and a Tier 1 capital adequacy of 14.81%, exceeding minimum regulatory requirements.

The regulatory capital requirements are strictly observed when managing economic capital. The Bank's regulatory capital comprises two tiers:

- Tier 1 capital: share capital and share premium, less accumulated losses. The book value of intangible assets is deducted in arriving at Tier 1 capital; and
- Tier 2 capital: IFRS 9 general provisions and capital qualifying debt instruments

3. Liquidity risk

The purpose of this document is to disclose both qualitative and quantitative information regarding the Bank's Liquidity position, in specific the Liquidity Coverage Ratio in terms of the Basel III requirements under Regulation 43 of the regulations relating to banks.

In terms of Regulation 43(1)(e)(iii)(F) of regulations relating to banks, minimum disclosure on the Liquidity Coverage Ratio of the bank is required on a quarterly basis. This announcement meets the on-going report requirement for quarterly disclosure in terms of Pillar 3 of the Basel III capital accord.

The Pillar 3 report is produced and published quarterly. This report is verified and approved internally in line with the Bank's disclosure policy.

The Pillar 3 report has not been audited by the Bank's external auditors.

Liquidity risk is defined as the risk of not being able to generate sufficient cash to meet the Bank's commitment to lenders, depositors and other creditors at any point in time. The management of liquidity is primarily designed to ensure that depositors' funding requirements can be met and that the Bank has sufficient funding in place to ensure payment of daily transactions.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Bank's short-, medium- and long-term funding and liquidity management requirements. The Bank manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Liquidity risk management is essentially inseparable from the core banking activities of advances growth and profitability management. Liquidity risk management form an integral part of proactive asset and liability management, which is managed by the Bank's Asset, Liability and Capital Committee (ALCCO).

Stress scenarios and testing have been undertaken thereby allowing the Bank to identify and be prepared for such eventualities. These scenarios have ensured that the Bank is well prepared to manage any liquidity risks that may occur.

The Liquidity Ratios, i.e. Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR), introduced by Basel III are monitored and managed by the Bank's Asset, Liability and Capital Committee (ALCCO). The Liquidity Coverage Ratio has been fully implemented from 01 January 2015 and the minimum requirement is back at 100% for September 2022 post the COVID pandemic for the LCR.
